BUDDED PECAN TREES, SEASON OF 1920-1921

THIRTY-THREE years' experience with the pecan has convinced me more and more of its profitability. The demand for the best nuts is constantly increasing. Trees from fifteen to two hundred years old are annually producing their crops of nuts to the delight both of the palate and pocketbooks of their owners. A grove once established, a pound of pecans can be grown more cheaply than a pound of cotton; and the grower has twelve months of the year in which to sell them, and the world for his market.

But if success is to come to the pecan grower, there are certain precautions that must be observed: (1) Strong and vigorous budded trees should be set of such varieties as are adapted to the section where they are to be grown. Avoid stunted trees, for a runt in the nursery will remain a dwarf in the grove. (2) Set trees only on the best land. (3) Cultivate, fertilize and care for them in the best manner. These are the three most important requisites to successful pecan growing either on a small or large scale. Observe them and you will not be disappointed.

SOME FACTS ABOUT MY TREES

Great care is taken to send out only strong and vigorous trees, which are true to name.

My scions are taken from my own trees, which may be seen growing and fruiting in my groves.

Only strong and vigorous stocks are used for propagating purposes.

I have no agents but my bearing trees, my nursery stock, and my former customers. They speak for themselves.

A cordial invitation is extended to visit my nursery and orchards of 240 acres located near Cairo. To see is to learn.

All orders are accepted subject to weather and other conditions beyond my control.

My experience is at the command of those who wish advice as to the best varieties to set in any particular section.

BUDDED PECAN TREES, SEASON OF 1920-1921

Cash orders receive first consideration. One-fourth of the purchase price should accompany all orders; and this is required on all C. O. D. shipments. If you want credit, give assurance of good faith, and furnish evidence of financial responsibility.

No trees held later than December 1st unless 25% of the price is paid before that date. Privilege is reserved of cancelling without notice all orders not thus provided for. If trees are to be held later than January 15th, payment in full is necessary, unless special arrangement to the contrary is made.

The prices given below are for strong, well-rooted trees, carefully packed and delivered to the express or railroad company at Cairo.

PRICES 1920-1921

	1	10	100	1000
1 to 2 feet-----	\$.80	\$ 7.00	\$ 60.00	\$ 500.00
2 to 3 feet-----	1.00	9.00	80.00	700.00
3 to 4 feet-----	1.10	10.00	90.00	800.00
4 to 5 feet-----	1.25	11.00	100.00	900.00
5 to 6 feet-----	1.40	12.50	110.00	1,000.00
6 to 8 feet-----	1.60	14.50	135.00	1,250.00
8 to 10 feet-----	1.80	17.00	160.00	

5 trees go at 10 rates, 50 at 100 rates, etc.

VARIETIES

I am testing about forty of the most promising varieties of pecans. The following I consider among the best of these:

Stuart is an old favorite that has been widely tested. This is a safe variety to plant and succeeds over a wider territory than probably any other variety.

Schley is placed by some at the head of the list. It is a large, thin-shelled nut of fine flavor, and is well filled with meat.

BUDDED PECAN TREES, SEASON OF 1920-1921

Frotscher is a large, thin-shelled nut, which has been widely planted.

Van Deman has also been extensively disseminated, and with many growers it stands at or near the head of the list.

Success is a nut of fine flavor. Originating in Mississippi, it has been widely disseminated during the last few years.

Delmas is a large nut, and a very early and prolific bearer.

Pabst is a safe nut; and while not quite so large as some of the above, yet it is a good bearer, and one can hardly make a mistake in setting it.

Nelson is probably the largest pecan grown. It is a strong, vigorous grower, and an early and prolific bearer. Its shell is thick.

Moneymaker is growing in favor. It is an early bearer, prolific, healthy and in every way is promising.

Can also furnish **Moore, Waukeenah, Mobile, Curtis, Alley, James, Bradley, and Teche** in limited quantities.

If in doubt as to the best varieties to set, this, when left to me, will receive my most careful attention, thus insuring a better selection than an inexperienced grower could make for himself.

The transplanting season extends from the latter part of November to the early part of the following March. Other things, however, being equal the earlier in the season trees are set the better and more promptly they grow off the following season.

I have a few "Rush" English walnuts budded on black walnut stock. These are promising. Price \$1.00 each.

GERATY'S FROST-PROOF Cabbage Plants DOUBLE YOUR PROFITS

Read every word of this circular. It means a prosperous year for you.

EARLY JERSEY WAKEFIELD
THE EARLIEST CABBAGE GROWN

CHARLESTON LARGE TYPE
WAKEFIELD 2d EARLIEST

SUCCESSION THE EARLIEST
FLAT HEAD VARIETY.

EARLY FLAT DUTCH
FOLLOWS SUCCESSION.

GUARANTEE

If the *increased yield* of headed cabbage from our plants, compared with the yield from cheaper plants of same varieties sold by others, planted at the same time and grown under the same conditions, is not worth more than the difference in cost, we will refund the entire purchase price. There is a fifty-three year reputation of honest dealing behind this guarantee.

Wm. C. Geraty Co's., cabbage plants are grown on Yonges Island, off the coast of South Carolina where plants have to be tough to survive. At eight to ten weeks of age they are ready for transplanting and are guaranteed against all weather conditions down to 20 degrees above zero, although we have numberless records of our plants having survived conditions as low as 10 above zero with no injury whatever to the plants.

Geraty's plants are absolutely Frost-Proof—are grown from seed of strains which have been selected with exacting care for over fifty years. Our long years of seed selecting experience guarantees the parentage of every cabbage plant you buy from us. Absolutely no weak stock—no loss—no waste but all gain—double gain.

Compared with ordinary cabbage plants from untested and underbred parentage, our plants, in most instances, yield double the number of pounds per acre—often more.

Three Weeks Earlier to Market

Our plants should be planted a month or six weeks earlier than home grown plants. The roots will start growing at once but the tops will not start until Spring opens. The roots by then are established and assimilating the fertilizer and plant food and the tops will grow with a rush and headed cabbage will mature ready for market two or three weeks earlier than hot bed or cold frame plants. You know the big prices that are paid for first-on-the-market cabbage.

Be a big money maker this year—not merely a living maker. The present high freight rates coupled with the increased cost of crates, etc., will enable you to undersell shipped in cabbage in your local market and make a tremendous profit even if you sell as low as two cents a pound. Our plants should produce from six to ten tons to the acre and you can make this the most prosperous year you ever had if you act on the above suggestion.

Pay no attention to the hard, stunted and wilted appearance of plants on arrival—they are absolutely guaranteed—set them out as soon as you receive them and be prepared for some astonishing crop results.

Four Varieties—each one a Geraty strain with a full pedigree. Early Jersey Wakefield, Charleston Large Type Wakefield, Succession and Early Flat Dutch.

Prices by Parcel Post, postpaid: In lots of 100 to 400, 50 cents per 100; 500 plants, all one variety, \$1.75; 1000 plants, all one variety, \$3.25. Plants packed only in even hundreds as follows: 100, 200, 300, 400, 500 or 1000 of one variety to package.

Prices by Express, buyer paying delivery charges: Lots of 1000 to 4000 plants, \$2.25 per 1000; 5000 and upward, \$2.00 per 1000. For express shipments plants are packed 1000 to 2000 plants of a variety to a package. Weight per 1000, packed for shipment, about 25 pounds. Terms cash with order. No plants shipped C.O.D.

Others are doubling their profits with Geraty's Frost-Proof, Double Crop Cabbage Plants—so can you. Act promptly. Send your order NOW so that you may be sure of having these money-making plants when you want them.
